DETAILED ACTION

General status

1. This is a Non-Final Action on the Merits. Claims 1 and 2 are pending in the case and are being examined.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kikukawa et al. [US 6,335,502] in view of Bettge et al. [US 5,168,139].

Kikukawa et al. disclose a grounding switch having :

- a moveable contact piece [36] which passes through an electrically conductive encapsulating housing wall [1,39,10; Figures 1-3,6; Column 5, lines 14-15, Column 8, lines 65-66] such that it is sealed by means of a sealing element [38];
- the moveable contact piece [36] being electrically conductively connected to the encapsulating housing wall [39] via the sealing element in the form of a bellows [49].

Kikukawa et al. disclose the moveable contact piece [36] driven by an operating rod connected to element [35]. Kikukawa et al. disclose the instant claimed invention except for details of a journal bearing supported on the encapsulating housing. Bettge

Art Unit: 2832

et al. disclose a switch having a moveable contact piece [5] being guided in a journal bearing [8] supported on the encapsulating housing. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use electrically insulating handle for operating the grounding switch and provide a journal bearing in Kikukawa, as suggested by Bettge et al., in order to support the movable contact [Column 2, line 59].

Response to Arguments

4. Applicant's arguments with respect to claims 1 and 2 have been considered but are moot in view of the new ground(s) of rejection.
